

PROJECT NAME: Storm Water Infrastructure Upgrade

RECIPIENT: City of Taylorsville

LOCATION: Taylorsville, UT

PURPOSE: The service area for the City of Taylorsville is approximately 65,000 persons. Upstream users dependent upon Taylorsville systems for conveyance are approximately 25,000 persons. Downstream users dependent upon the City achieving clean water regulation number approximately 625,000.

The overall City and its department budgets have been cut by approximately 12% during the past year and revenues are projected to go even lower in the upcoming quarter and year. To avoid cutting staff and essential services, all capital improvement projects have been eliminated from the budget. Federal support is requested to allow the City to complete these very important capital improvements during the lean budget year.

AMOUNT: \$850,000
